

test card — RH6

Thank you for downloading this test card.

The card is full size – 140 x 85mm/5.5 x 3.35ins/5½ x 3¾ins and at full resolution – 300dpi.

Please note that all ordered QSL cards come with three identical images of your chosen design on a single page PDF document. The PDF file is posted to you as an e-mail attachment.

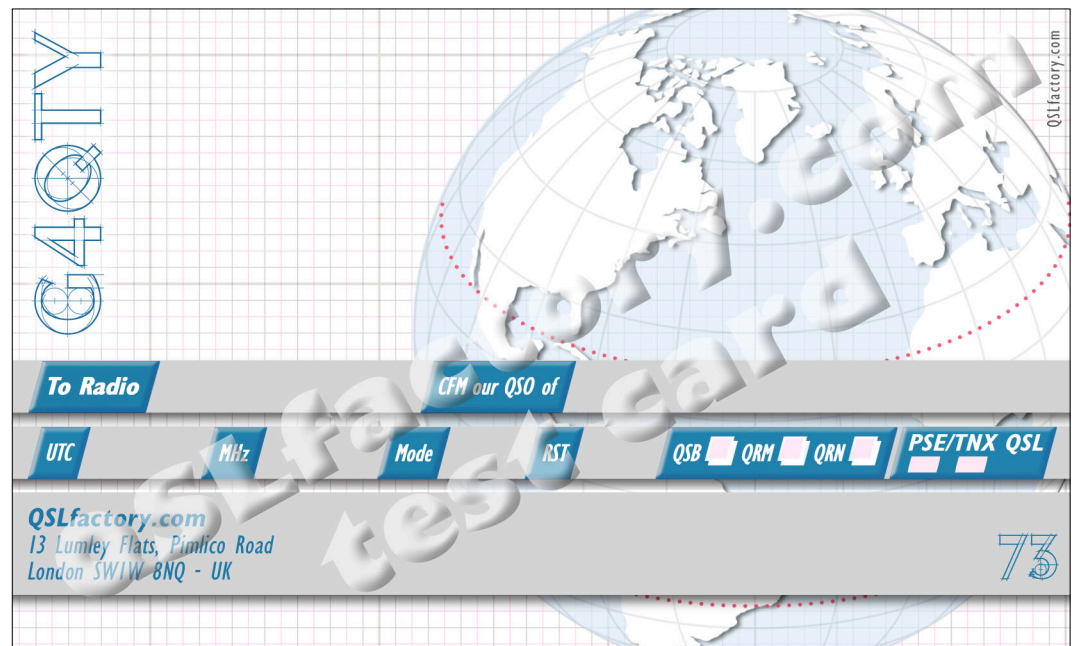

Here are a few tips in case you missed them on the site.

- Always use your printers highest resolution setting – 720dpi plus.
- Always use photo quality inkjet paper – 120g/sm plus.
- If you intend using gloss paper to print the card, you'll need an overhead projection pen, for filling in the card. These pens offer completely smudge free results – pens available from artist material suppliers.

For more information and explanation, please visit [Inkjet QSLs](#) on our site.

The black keyline around the card is there to make trimming out easier, it is not part of the design.

Of course, the annoying watermark is only present on the test cards.

Carefully... trim out the card using a craft knife and ruler.
